**Description:**  
 This Site Guide illustrates the suggested areas and sun exposures for each type of garden design offered. The North orientation and size and shape of your property may differ and should be taken into account to make sure a garden design is suitable for your landscape. Each garden design is intended for use in small areas and not to landscape an entire property. This diagram is not a landscape plan and is not intended to be used as such. The example property depicted is a typical 7000 sq ft lot.
